**RE: Discussion with Mosaic on Radiation on Phosphate Mined Lands**

Dear Mr. Hill:

Mosaic Fertilizer, LLC (Mosaic) appreciates the opportunity to come to the US EPA Region 4 office in Atlanta on March 18, 2010 to meet with you and engage in an open discussion with you and your staff at EPA regarding radiation on phosphate mined lands in Florida. In advance of the meeting, we thought it might be helpful to communicate what we hope to achieve. We would also welcome any ideas or topics for the discussion that you or your staff may have in return.

Mosaic is interested in working with the US EPA in a proactive manner and to have a dialogue of mutual interest. Some areas of mutual interest that we hope to discuss with you on March 18 include:

- We hope to gain an understanding of EPA's current viewpoint on the issue of radiation on mined lands and whether your focus is on public health or something else.
- We would like to engage in a discussion of what EPA believes is the likely path to set standards, gather data, manage risks, and communicate regarding the radiation issue.
- Mosaic, as the largest phosphate mining company in Florida, is interested in what actions the industry can take to engage proactively with EPA, other state and federal agencies, and the residents of Florida toward appropriate next steps.

We hope that our meeting on March 18 will be the starting point for future productive discussions and actions. Please feel free to contact me with any questions or comments at (850) 205-3183 or via email [debbie.waters@mosaicco.com](mailto:debbie.waters@mosaicco.com). We appreciate your willingness to meet with us and are looking forward to the opportunity.

Sincerely,

A handwritten signature in blue ink that reads "Debra R. Waters".
